

SAFWAN FEROZ SHAIKH

AI and Data Science Engineer | Machine Learning | Data Science | Computer Vision
+91 8767299267 | safwanshaikh489@gmail.com | India

PROFESSIONAL SUMMARY

Results-driven AI and Data Science Engineer with expertise in machine learning, predictive analytics, computer vision, and generative AI. Proficient in building end-to-end AI solutions using Python, TensorFlow, PyTorch, YOLOv8, and OpenCV. Strong foundation in data pipeline optimization, ETL, statistical modeling, and cloud technologies. Proven ability to deliver production-ready applications combining deep learning, NLP, and business intelligence.

CORE TECHNICAL SKILLS

Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, Clustering, Neural Networks, Deep Learning, PyTorch, TensorFlow, Scikit-learn

Data Science & Analytics: Data Preprocessing, Feature Engineering, EDA, Statistical Modeling, Predictive Analytics, Data Pipeline Validation, ETL, Data Cleansing, Query Optimization

Computer Vision: YOLOv8, OpenCV, Real-time Object Detection, Image Processing, Video Analysis, Traffic Analysis, PIL

Generative AI & NLP: Large Language Models, Retrieval-Augmented Generation (RAG), IBM Granite Models, NLP, Text Generation, LangGraph

Business Intelligence: Power BI, Tableau, Dashboard Design, Data Visualization, KPI Tracking, Business Metrics, Reporting

Programming Languages: Python, SQL, MySQL, Java, C, PHP, JavaScript, HTML, CSS, React

Frameworks & Libraries: Flask, Streamlit, Pandas, NumPy, SciPy, Angular.js, Tailwind CSS, Leaflet.js, OpenStreetMap

Tools & Platforms: Git, JupyterLab, Google Colab, Visual Studio, AWS, Google Cloud, MySQL, Server-Sent Events (SSE)

PROFESSIONAL EXPERIENCE

Data Science & ML Intern | YBI Foundation | 12/2025 - 03/2026

Cleaned and preprocessed 100K+ records using Pandas, NumPy ensuring data integrity; Reduced pipeline failures by 30%; Validated ML algorithms for predictive analysis and classification; Supported model deployment with anomaly detection

Software Developer Trainee (Granite Models) | IBM | 02/2026 - 03/2026

Integrated IBM Granite LLMs into production applications; Debugged Generative AI model deployments; Optimized data preprocessing pipelines; Handled API response errors; Reduced API latency by 25%

Full Stack Development | Thiranex | 07/2026 - 08/2026

Built and enhanced responsive web applications using HTML, CSS, JavaScript, React.js, Node.js, Express.js, and REST APIs, following industry best practices in a project-based development environment; Performed debugging and API testing, and collaborated using Git/GitHub.

KEY PROJECT

Smart Traffic Density & Signal Optimization System (May 2026)

Engineered AI-powered traffic analysis tool using YOLOv8, OpenCV for real-time vehicle detection; Implemented dynamic traffic density classification (Low/Moderate/High); Built Flask web dashboard with Leaflet.js, OpenStreetMap visualization; Developed automated signal optimization based on live vehicle count data

EDUCATION & CERTIFICATIONS

B.Tech in AI and Data Science | N.K. Orchid College of Engineering and Technology (2022-2026).

Oracle AI Foundation Associate | Nvidia Deep Learning Fundamentals | NPTEL Database Management | Microsoft Power BI | Google Cloud Skills | NXTWAVE Generative Model | InfoStack Web Development | Udemy IP Rights
